

Press Release

Fürstenfeldbruck, December, 2018

Martin Haug strengthens the Güntner management board

Martin Haug became the new Managing Director for Sales and Marketing at Güntner on 1 December, thus completing the management team.

Martin Haug is a Master Craftsman for Refrigeration Plant Constructions and business management graduate with over 25 years of experience in the refrigeration and air conditioning industry. In 2000, he was awarded the Bavarian State Government Master Prize.

After holding management positions at various well-known companies, he was most recently Managing Director at Beijer Ref Deutschland GmbH for six and a half years. As Managing Director at Güntner, he will be responsible for Sales and Marketing for the EMEA region. With his experience, we will continue to drive Güntner's growth in a dynamic market and increasingly global competitive environment.

He is looking forward to this challenging task and says: "For me, it's important to further establish the well-known quality of both the products and the employees in the market and thus further expand our growth and market position."

In addition to his involvement in N.I.K.K.I. – the trainee initiative for the refrigeration and air conditioning industry – he has been a member of the master craftsman examination board at the Meisterschule für Kälte und Klimatechnik (master school for refrigeration and air conditioning) in Munich for more than 15 years. He is also a member of the ZVKKW (Central Association of Refrigeration, Air Conditioning and Heat Pumps) and the VDKF (Association of German Refrigeration and Air Conditioning Companies).

About Güntner

Based in Fürstenfeldbruck near Munich, Germany, Güntner GmbH & Co. KG is a world leader in the manufacture of refrigeration and air conditioning equipment components. With approx. 3,000 employees worldwide and production sites in Germany, Hungary, Romania, Indonesia, Mexico, Brazil and Russia, the company shows a strong presence for their partners in all markets. Decades of experience in the industry and the consistent integration of the latest technologies and research findings ensure the high-quality standard of Güntner solutions. The international areas of application comprise energy & process cooling projects, industrial and commercial applications in the field of food production and storage as well as HVAC applications for buildings and specific applications such as server room cooling.
