

### Güntner part of winner team in RAC Industry Awards 2013

On September 25, this year's RAC Cooling Industry Awards ceremony was attended by more than 700 guests from the UK's Refrigeration and Air Conditioning sector. With numerous projects submitted in the different categories, the judges had a difficult time in deciding who would be presented with the coveted awards.

**Fürstenfeldbruck,  
October 2013**

Güntner was part of a team that included the companies Tesco, Carter Synergy, Reflok and FSW and that was nominated, together with six other teams, for the category "Retail Project of the Year". The award is yearly made to a retail refrigeration or air conditioning project demonstrating significant environmental advantages over traditional methods in areas such as emissions reduction, cooling performance, energy efficiency, leak containment etc.

#### **Award „Retail Project of the Year“**

The judges look for solutions that push the boundaries, either through developments in conventional approaches or the use of novel methods or technology.

The winning project for the team of the companies Güntner, Tesco, Carter Synergy, Reflok and FSW was for Tesco's Metro store in Wolverhampton which features the first all-Aluminium refrigeration system anywhere in the world. The installation was completed in April 2013 by major refrigeration contractor Carter Synergy and makes exclusive use of Reflok Aluminium piping and heat-free connectors along with a Güntner microchannel heat exchanger with microox technology, also completely made of Aluminium.

#### **“Groundbreaking” solution**

The installation, which is also designed to be leak-free in store, thanks to its specification with the non-brazed Reflok, was described simply as “groundbreaking” by the judges. This globally unique system is sure to be repeated in numerous future installations!

## About Güntner

Based in Fürstfeldbruck near Munich, Germany, Güntner GmbH & Co. KG is a world leader in the manufacture of refrigeration and air-conditioning equipment components. With 3,000 employees worldwide and production sites in Germany, Hungary, Indonesia, Mexico, Brasil and Russia, the company shows a strong presence for their partners in all markets. Decades of experience in the industry and the consistent integration of the latest technologies and research findings ensure the high quality standard of Güntner solutions. Users include the international automotive, foodstuffs, pharmaceutical and computer industries and numerous public sector institutions.

As a daughter of the A-HEAT AG, the company benefits from the inter-company information and know-how transfer which imparts decisive impulses to the different companies forming part of the Group.

Based in Vienna, Austria, A-HEAT AG, Allied Heat Exchange Technology AG, is an internationally active leading technology group with a strong focus on refrigeration and air-conditioning technology as well as process engineering. The group serves as holding company for the Güntner GmbH & Co. KG, JAEGGI Hybridtechnologie AG, thermowave GmbH and basetec products + solutions GmbH.
